

LMH Range - New Connector Styles

Following requests from its customers, Lane Electronics, the industry's leading supplier of electrical interconnection products, announces an extension to the Weald LMH range of connectors. New shell styles coupled with the recent launch of new high power contact arrangements, satisfy a variety of applications including power distribution in military vehicles, charger systems, industrial plant and equipment.

The LMH range of connectors offer superior electrical properties, and can be used for AC or DC applications up to 1500V and 45A. These are tested in accordance with BS/CECC 75201-03

Manufactured by Weald Electronics Ltd, the LMH range is available in various finishes, including RoHS compliant variants, and combines an industry leading blend of size, weight, quality, durability and performance.

Weald Electronics now offer 3D CAD models for all of its connector ranges including the LMH range to assist in the design of your equipment. See www.fclane.com for further details.
