

Defence Systems & Equipment International Exhibition 2009

Defence Systems & Equipment International 2009

Global Security in Defence

8-11 September 2009 ExCel London, UK

Following our successful participation at DSEi 2009, the world's premier Defence Systems and Equipment Exhibition, we would like to take this opportunity to thank all the visitors to our stand and for the interest shown in our products.

DSEi 2009 was attended by many high calibre visitors associated with Global Security and Defence. We therefore presented our core Military ranges from Weald Electronics, HUBER+SUHNER and Souriau Connection Technology. In particular we took the opportunity to showcase our new High-Speed Data solutions in the form of Souriau's 'Elio'® Fibre Optic and Quadrax connectors and the AC/DC power connector solutions from Weald Electronics. We also presented HUBER+SUHNER'S Co-axial and Microwave connectors and demonstrated their un-paralleled cable assembly capabilities.

If you require any further information on our new or existing products, then please visit our website, www.fclane.com, or contact our Sales Team as per details below.
