

Defence Equipment and Support Exhibition

DVD2010

Millbrook • Bedfordshire • 23.06.10 • 24.06.10

de&s

Following our successful participation at DVD, the UK's leading defence equipment exhibition for 2010, we would like to take this opportunity to thank all the visitors to our stand and for the interest shown in our products.

DVD 2010 was attended by many high calibre visitors associated with Global Security and Defence. We therefore presented our core Military ranges from Weald Electronics and Souriau Connection Technology. In particular we took the opportunity to showcase our new High-Speed Data solutions in the form of Souriau's 'Elio'® Fibre Optic and Quadrax connectors, Souriau's D38999 Series III DC power connectors and the AC/DC power connector solutions from Weald Electronics. Lane Electronics offers a rapid assembly & delivery service for all of these and many more connector variants.

If you require any further information on our new or existing products, then please visit our website, www.fclane.com, or contact our Sales Team as per details below.
