We've been supplying high-performance circular connectors for demanding applications and environments for more than 50 years. Now, we've put this wealth of experience into a class-leading accessories package which includes backshells and protective covers from Weald Electronics and heat shrink materials from HellermannTyton.

## SEALING AND STRAIN RELIEF BACKSHELLS

NEW

Weald  
ELECTRONICS

- Overall 360° screening against EMI/RFI interference
- Compatible with MIL-DTL-38999 Series III and IV or MIL-DTL-26482 Series I circular connectors
- Provide strain-relief and cable support to prevent bending or overflexing
- Protect the effectiveness of the cable, sealing against water and dirt ingress
- Two-part components allow uncoupling for repairs without damaging the boot
- Many sizes and plating finishes available from stock
- Tool-free constant force spring or band strap provided

## PROTECTIVE COVERS

NEW

Weald  
ELECTRONICS

- Designed to perform to the requirements of MIL-DTL-38999 and MIL-DTL-26482 specifications
- Provide environmental protection of military circular connectors in both threaded and bayonet versions
- All parts machined from solid material for reliable strength and performance
- Stainless steel wire ropes or nylon cords
- Wide choice of plating options available
- Many variants, sizes and plating finishes available from stock

## HEAT-SHRINKABLE MOULDED SHAPES AND ADHESIVES

HellermannTyton

- Heat-shrinkable strain-relieving boots for connector backshell to cable transitions
- Adhesive lined and plain shapes held in stock
- Specialised shapes available in a wide range of sizes, materials and adhesive options
- Fuel resistant, high performance heat-shrinkable SE28 2:1 series tubing available in several sizes.
- V9500 high performance two-part epoxy adhesives developed to meet military requirements
